

The impacts of Covid-19 cases upon real estate sales in Victoria

Jeremy Chia – Anna Nguyen - Matthew Taylor - Kenny Dao

Presentation summary

The big question

Working questions

Data Collection

The analysis process (Jupyter)

Data exploration & cleanup (Jupyter)

Findings & Conclusion

The big question

- ◆ Have the numbers of Covid-19 cases in the most popular Local Government Area changed their popularity for homeowners?
- ◆ Hypothesis: High Covid-19 cases in the most popular Local Government Area will reduce their popularity.

The working questions

1. **What are the three most popular Local Government Areas in Victoria before March 2020?**
 1. Measured by changes to housing price in each LGA
 2. Measured by changes to housing purchase in each LGA
2. **What are the factors that contribute to this popularity?**
 1. Does the concentration of schools contribute to its popularity?
 2. Does the concentration of hospitals contribute to its popularity?
3. **How has the popularity of the top 3 LGAs in Victoria changed after March 2020?**
 1. Measured by changes to housing price & in each LGA
 2. Measured by changes to housing purchase in each LGA
4. **Does the number of Covid-19 cases from March to June 2020 in each LGA contribute to its popularity?**

Data Collection

Real Estate data

Property Dataset

Property Price Analysis (Pre-Covid)

Property Price Analysis (Post-Covid)

Property Sold During Covid-19

Property Sold By Suburb During Covid-19

Property Sold [Pre vs During Covid-19]

Sept'19 - Jan'20 (Pre covid) - Number of Schools vs. Total Sales Count

Feb'20 - July'20 (During covid) - Number of Schools vs. Total Sales Count

Property Price Change [Pre vs During Covid-19]

Sept'19 - Jan'20 (Pre covid) - Number of Schools vs. Percent change in House Price

Real-Estate data before Covid

The r-squared is: 0.08410507608477118 The correlation between both factors is 0.29

Data exploration & cleanup

(Jupyter Notebook)

The analysis process

(Jupyter Notebook)

Findings & Conclusion & Implications

◆ Before Covid (September 2018 – January 2020)

- ◆ The top 3 LGAs are: Stonnington (1), Bayside (2), Monash (3)
- ◆ Hospitals: 8% of the house price can be explained by the number of hospitals
- ◆ Schools: The more schools there are, the higher the total number of sales is in a Local Government area.

◆ After Covid (February – July 2020)

- ◆ Stonnington: - 23% (Most Covid-cases in April, second most in May until mid June)
- ◆ Bayside: + 3.6% (Next to Stonnington, with an average number of Covid-cases)
- ◆ Monash: - 9.9% (Top 5 Covid-cases in early April, top 15 Covid-cases until mid June)
